80. Design a friendship game to practice social skills.

User Interface Design Projects

81. Design a login screen with a friendly cartoon mascot.

82. Create a menu with bright icons for easy navigation.

83. Make an error page with a helpful cartoon guide.

84. Build a loading screen with a fun animated progress bar.

85. Design a search bar with a moving magnifying glass icon.

86. Create a contact form with simple, clear input fields.

87. Make buttons with hover effects and light shadows.

88. Build a profile page where users pick and change avatars.

89. Design pop-up notifications with gentle sounds.

90. Create a shopping cart page that counts items simply.

91. Make slider controls with colorful handles and tracks.

92. Build a chat screen with emojis and sticker options.

93. Design a calendar view highlighting events in bright colors.

94. Create a photo gallery with zoom and share buttons.

95. Make a dashboard with simple info panels and widgets.

96. Build a form with clear validation messages.

97. Design a social feed with like and comment buttons.

98. Create a settings page with easy toggle switches.

99. Make progress bars with badges and rewards.

100. Build onboarding screens that guide new users step by step.

101. Design pricing tables comparing features clearly.

102. Create pop-up windows with close buttons and overlays.

103. Make breadcrumb navigation showing clickable paths.

104. Build search results with filters and sort options.

105. Design empty states with kind messages and illustrations.

106. Create loading animations with spinning wheels.

107. Make tab navigation with active state indicators.

108. Build tooltips with helpful arrows and text.

109. Design a footer with links and social media icons.

110. Create a sidebar menu that collapses and expands.

111. Make confirmation dialogs with clear yes/no buttons.

112. Build dropdown menus with hover animations.

113. Design card layouts with shadows and hover effects.

114. Create toggle switches with clear on/off states.

115. Make pagination controls with numbered pages.

116. Build a video player with simple play/pause buttons.

117. Design comment sections with reply and like features.

118. Create a rating system with stars and reviews.

119. Make accordion menus that expand or collapse.

120. Build a carousel slider with arrows and dots.

Educational App Design Projects

121. Create a multiplication table app with bright number grids.

122. Design a phonics app with letter sounds recorded clearly.

123. Make a geography quiz app with an interactive world map.

124. Build a science lab app for safe virtual experiments.

125. Create a history timeline with important event markers.

126. Design a language app with spoken practice features.

127. Make a story math app where problems are in short tales.

128. Build a reading app with questions after each story part.

129. Create a typing app with fun keyboard challenges.

130. Design a periodic table app showing element facts.

131. Make a fraction app using pizza slices to teach parts.

132. Build a word-match app with pictures and words.

133. Create a solar system app with planet facts and images.

134. Design a grammar game with sentence building puzzles.

135. Make a time-telling app with both clock types.

136. Build a money-counting app using coins and bills.

137. Create a measurement app with rulers and scales.

138. Design an art history app with famous paintings info.

139. Make a music theory app teaching notes and reading.

140. Build a coding basics app with simple programming ideas.

141. Create a health app with body system information.

142. Design an environment app with recycling game tasks.

143. Make a culture app exploring different countries.

144. Build a writing app with story idea prompts.

145. Create a mental math app with quick number challenges.

146. Design a handwriting app with letter tracing practice.

147. Make a logic game with puzzles to boost thinking.

148. Build a speaking app with simple presentation practice.

149. Create a money app teaching saving and spending.

150. Design an emotion app with games to recognize feelings.

151. Make a life skills app to manage daily chores.

152. Build a career app with jobs and info on each.

153. Create a study habits app with planning tools.

154. Design a test prep app with practice question sets.

155. Make a research skills app to judge good sources.

156. Build a teamwork app for group project planning.

157. Create an internet safety app teaching digital rules.

158. Design a goal tracker app showing progress clearly.

159. Make a mindfulness app with breathing and calm exercises.

160. Build a problem-solving app guiding steps one by one.

Creative Design Projects

161. Design birthday card templates with party decorations.

162. Create school event posters with bright colors.

163. Make digital greeting cards with animation and sound.

164. Build logos for student clubs and groups.

165. Create bookmark designs with reading quotes and art.

166. Design sticker sheets with various cute characters.

167. Make comic pages with speech bubbles.

168. Build T-shirt designs showing school spirit.

169. Create social media post layouts with trending tags.

170. Design business cards for pretend professional use.

171. Make photo frames with decorative borders.

172. Build wallpaper patterns with repeating colors.

173. Create certificate templates for awards and achievements.

174. Design flyers for community events and announcements.

175. Make scrapbook pages with photo placements.

176. Build calendar designs with monthly themes.

177. Create label designs for organizing items.

178. Design magazine covers with eye-catching titles.

179. Make art prints with inspiring quotes.

180. Build packaging mockups for imaginary products.

181. Create presentation slides with clear layouts.

182. Design badge templates for skills and awards.

183. Make vision boards with goal pictures.

184. Build infographic layouts with simple charts.

185. Create coloring pages with fun patterns.

186. Design book covers with style fitting their genre.

187. Make mood boards with color and texture ideas.

188. Build icon sets with matching styles.

189. Create fabric patterns for wrapping paper.

190. Design email newsletter layouts with engaging sections.

191. Make recipe card templates listing ingredients and steps.

192. Build award certificate designs with formal layouts.

193. Create party decor templates with celebration graphics.

194. Design mind map templates for brainstorming.

195. Make photo collage layouts with creative arrangements.

196. Build letterhead templates for official letters.

197. Create crossword puzzle layouts with organized clues.

198. Design event program templates with schedules.

199. Make vision statement posters with motivational quotes.

200. Build branding packages with logos and color sets.

Social Media Design Projects

201. Create Instagram story templates with bright backgrounds.

202. Design Facebook post layouts mixing image and text.

203. Make Twitter header designs for personal branding.

204. Build YouTube thumbnails with eye-catching visuals.

205. Create Pinterest pin templates in a tall format.

206. Design TikTok cover images with trending tags.

207. Make LinkedIn post graphics with a professional look.

208. Build Snapchat filters with fun overlay effects.

209. Create Discord server banners with theme art.

210. Design WhatsApp status templates with quotes and images.

211. Make Reddit post images that encourage upvotes.

212. Build Twitch stream overlays with gaming themes.

213. Create blog header images that match the topic.

214. Design email signature templates with contact style.

215. Make social media calendars for planning posts.

216. Build profile picture frames for special events.

217. Create quote graphics with inspiring words.

218. Design poll templates with clear question and choices.

219. Make infographic posts with easy-to-read stats.

220. Build hashtag graphics matching trending topics.

221. Create announcement templates for big news.

222. Design behind-the-scenes layouts with casual photos.

223. Make product showcase posts highlighting features.

224. Build event promotion graphics with date and place.

225. Create tutorial post templates showing each step.

226. Design frames for user-submitted content.

227. Make contest posts with prize details and rules.

228. Build testimonial layouts with quotes and photos.

229. Create milestone posts with achievement numbers.

230. Design collaboration posts showing partner logos.

231. Make video preview images with play button overlays.

232. Build story highlight covers with matching icons.

233. Create live stream announcement graphics with schedule.

234. Design community spotlight templates for member features.

235. Make seasonal posts with holiday theme art.

236. Build branded templates with logo and color match.

237. Create poll result graphics with simple charts.

238. Design throwback post templates with old photo frames.

239. Make welcome posts for new followers.

240. Build farewell posts with thank-you messages.

Portfolio and Resume Design Projects

241. Create portfolio covers with student name and contact.

242. Design resume templates with clear skill sections.

243. Make project showcase pages with images and descriptions.

244. Build an "about me" section with personality details.

245. Create skill bars showing progress in a visual way.

246. Design a timeline of achievements with dates.

247. Make contact cards with social media links.

248. Build testimonial sections with quotes and sources.

249. Create hobby pages with activity photos.

250. Design education layouts listing school and grade.

251. Make volunteer cards showing role and impact.

252. Build award sections with certificate images.

253. Create project detail pages showing steps and results.

254. Design interest bubble charts showing hobbies.

255. Make photo galleries with captions.

256. Build goal sections with plans and steps.

257. Create work samples showing before-and-after.

258. Design graphics highlighting personality traits.

259. Make timeline layouts of life events.

260. Build reference sections with names and contacts.

261. Create cover letter templates with personal intros.

262. Design social media buttons linking profiles.

263. Make video portfolio sections with embedded clips.

264. Build QR codes that link to an online portfolio.

265. Create infographic resumes with visual data.

266. Design buttons with hover effects for actions.

267. Make navigation menus with jump-to links.

268. Build footers with copyright and updates.

269. Create call-to-action buttons encouraging contact.

270. Design loading animations for transitions.

271. Make progress trackers showing project completion.

272. Build modal windows for image details.

273.   Create responsive layouts for desktop and mobile.

274.   Design scroll-triggered animation effects.

275.   Make forms for messages and inquiries.

276.   Build search features to filter portfolio items.

277.   Create accessibility features for screen readers.

278.   Design print versions of resumes and portfolios.

279.   Make thank-you pages with appreciation notes.

280.   Build analytics tracking for visits and engagement.

Figma Project Ideas for Beginners

1. Create an easy name card with your own name.

2. Make a colorful bookmark with your favorite quotes.

3. Build a simple weather app with sun and rain.

4. Create an easy login page with username and password.

5. Make a fun pizza menu with topping pictures.

6. Build a basic calculator app with bright number buttons.

7. Create a simple photo frame with a pretty border.

8. Make a basic contact form asking for name and email.

9. Build a colorful calendar page showing one month.

10. Create a simple music player with play and pause buttons.

14. Make a basic profile page with photo and information.

15. Build a simple popup notice with message and buttons.

16. Create a basic search bar with a magnifying glass icon.

17. Make a colorful loading screen with a spinning circle.

18. Build a simple pricing table with three plan choices.

19. Create a basic email template with header and body.

20. Make a simple dashboard with bright information boxes.

21. Build a basic footer with social media links.

22. Create a simple modal window with close button.

23. Make a basic breadcrumb trail with clickable links.

24. Build a simple card layout with image and text.

25. Create a colorful error page with a helpful message.

Figma Project Ideas for College Students

26. Build a campus event app where users can sign up.

27. Create a student grade tracker by semester.

28. Make a course schedule app that checks time conflicts.

29. Build a dining hall app showing menu and meal times.

30. Create a housing finder that matches roommates.

31. Make a library booking app to reserve study rooms.

32. Build a campus shuttle app with real-time location.

33. Create a club management tool with member options.

34. Make a career center app for job searching.

35. Build a fitness center app with class schedules.

36. Create a budget tracker with spending categories.

37. Make a textbook exchange app for buying and selling.

38. Build a safety app with emergency contact features.

39. Create a networking platform with profiles and chat.

40. Make an assignment tracker with deadline reminders.

41. Build an event calendar with RSVP and sharing.

42. Create a feedback tool for courses and professors.

43. Make a parking app that shows open spots.

44. Build a campus tour guide with maps and info.

45. Create a mentor matching tool based on skills.

46. Make a research tool with project planning boards.

47. Build a sustainability tracker for green activities.

48. Create a wellness app with mental health resources.

49. Make an alumni network app for career links.

50. Build an emergency alert system for the campus.

Figma Project Ideas with Source Code

51. Create a React to-do app that adds and deletes items.

52. Make a JavaScript weather widget using API data.

53. Build a CSS landing page with scroll animations.

54. Create an HTML contact form that sends emails.

55. Make a Vue.js shopping cart with product options.

56. Build a Bootstrap dashboard with grid layout.

57. Create a jQuery image slider with arrow controls.

58. Make a PHP user signup system with database storage.

59. Build an Angular chat app for real-time messages.

60. Create a Node.js blog platform with a CMS.

61. Make a Python data dashboard with interactive charts.

62. Build a Ruby on Rails social media app.

63. Create a WordPress theme with custom post types.

64. Make a Shopify store template with filters.

65. Build a Django web app with user login system.

66. Create an Express.js API with database routes.

67. Make a Flutter mobile app with native features.

68. Build an Electron desktop app with file access.

69. Create a React Native app with camera feature.

70. Make a Spring Boot API with REST endpoints.

71. Build a Laravel app with user role controls.

72. Create a Gatsby static site using markdown.

73. Make a Next.js app with server-side rendering.

74. Build a Svelte UI library with reusable parts.

75. Create a TypeScript app with type checks.

Figma Projects for Practice

76. Make different versions of the same login page.

77. Create new color themes for one website design.

78. Build mobile-friendly versions of a desktop app.

79. Make wireframes and mockups for side-by-side review.

80. Create user flow maps showing navigation paths.

81. Build style guides with fonts and color palettes.

82. Make a component library with reusable UI pieces.

83. Create clickable prototypes with simple animations.

84. Build A/B test layouts for buttons and pages.

85. Make designs that work with screen readers.

86. Create both dark and light themes for the app.

87. Build small hover and click animations.

88. Make empty screens and error message designs.

89. Create loading animations and progress bars.

90. Build forms that show error messages for mistakes.

91. Make step-by-step guides for new users.

92. Create different alert styles for notifications.

93. Build search features with filters and sorting.

94. Make user profile pages with edit options.

95. Create dashboard layouts with charts and widgets.

96. Build product pages with image gallery features.

97. Make social media post templates that match a brand.

98. Create email newsletter designs that adapt to screens.

99. Build mobile app splash screens with brand style.

100.   Make website headers with a logo and menu.

Figma Projects for Portfolio

101.   Create a full restaurant website with a menu.

102.   Build a mobile banking app with transaction history.

103.   Make a fitness tracking app with workouts and stats.

104. Create a travel planning site with destinations and maps.

105. Build a real estate platform with home search.

106. Make an online learning site with courses and lessons.

107. Create a health app for booking doctor appointments.

108. Build a social media platform with user profiles.

109. Make an e-commerce site with a shopping cart.

110. Create a music streaming app with playlists.

111. Build a food delivery app with restaurant info.

112. Make a project management tool for tracking tasks.

113. Create a news website with articles and categories.

114. Build a dating app that matches people by interest.

115. Make a meditation app with guided sessions.

116. Create a crypto trading platform with market data.

117. Build a job search site with application options.

118. Make a photo sharing app with editing tools.

119. Create a language learning app with lessons.

120. Build a video streaming site with shows and movies.

121. Make a personal finance app with budget tracking.

122. Create a weather app with forecasts and maps.

123. Build a recipe sharing site with cooking steps.

124. Make a car rental site with booking options.

125. Create an interior design app for room planning.
